

# IBM CLOUD ACCOUNT CREATION

**Project Name:** Containment zone alerting application

**Team ID:** PNT2022TMID13786

The screenshot shows a web browser window with the URL `app.sendgrid.com/guide`. The browser's tab bar includes several open tabs: SendGrid, GitHub, YouTube, and several 'New' tabs. The browser's address bar shows the URL. The page content is a guide for creating a sender identity. It features a sidebar on the left with navigation links: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS. The main content area has a heading 'Welcome, Priyadharshini!' and a subheading 'Send your first emails with Twilio SendGrid'. Below this, there is a section titled 'Create a sender identity' which explains that a sender identity is the 'from' email address. It offers two options: 'Create a Single Sender' (highlighted with a blue button) and 'Authenticate a domain instead'. An illustration shows an email header with 'Your Business' as the sender and '<jane.doe@your\_business.com>' as the email address. At the bottom of the page, there is a footer with the text 'Send your first email' and a note 'Please create a sender identity before sending your first email'. The Windows taskbar at the bottom shows the search bar, task view button, and several application icons, along with system information like '26°C Partly cloudy' and the date '11/18/2022'.

## Welcome, Priyadharshini!

To get up and running quickly, please follow the steps outlined below.

### Send your first emails with Twilio SendGrid

#### Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.
